DETAILED ACTION

This Office Action is in response to the amendment filed May 10, 2007 for the above identified patent application.

Election/Restrictions

1. Claims 14-17 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected group, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on May 10, 2007.
2. Applicant's election with traverse of claims 1-13 in the reply filed on May 10, 2007 is acknowledged. The traversal is on the ground(s) that the examiner has not established that examining all claims would be an undue burden. This is not found persuasive because these inventions are independent or distinct for the reasons given in the election requirement and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

The requirement is still deemed proper and is therefore made FINAL.

Priority

3. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-13 are rejected under 35 U.S.C. 102(b) as being anticipated by GB 2 352 484 (GB '484).

Referring to Figures 3 and 5, GB '484 discloses examples of a rolling, sliding part made from a bearing steel, a rolling, sliding surface thereof having a surface layer portion which is 56 to 64 in Rockwell C hardness, up to 12 vol. % in retained austenite content and 4 to 6 degrees in the X-ray half value width of martensite.

6. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Stahl F et al. in "UNTERSUCHUNGEN DER UEBERROLLUNGS-LEBENSDAUER VON WAEHLZLAGERKUGELN AUS STRANGGUSS 100CR6."
